

# Green flats initiative wins prize

SUSTAINABLE developers at Citu have scooped an award for eco-friendly flats in Leeds.

Homes at The Greenhouse, a property conversion completed last year in Beeston, benefit from ground source heating and cooling, solar panels, two wind turbines and grey water and rain water harvesting systems to be used for toilet flushing and washing machines.

The Best Development accolade was presented to Citu at the Yorkshire and Humber Microgeneration Awards Dinner, held at the Majestic Hotel in Harrogate.

BBC Look North's Paul Hudson, who hosted the dinner, praised the project for its eco-friendliness and for employing local workers.

**AWARD:** Leeds Greenhouse
